

ABSTRACT

WIRELESS LAN MEASUREMENT FEEDBACK

5 Measured data, such as WLAN data, are received. The measured data are
compared with expected data, such as expected WLAN data. Expected WLAN data can
be generated from various sources, for example floor plan data and access point data (e.g.,
quantity, placement, and/or configuration). Based on such measured data, WLAN features
can be changed, such as floor plan and/or access point data (e.g., quantity, placement,
10 and/or configuration).
